

# Can Your Hospital Isolate Large Numbers of People During a Public Health Emergency...

**Quickly, Conveniently and Without Building Modifications?**

The ECU product line are clinically tested, collapsible and portable containment units that control harmful contaminants during a wide range of applications. All ECU products provide regulatory compliance, assurance of patient safety, ease of use and a significant return on investment within a single containment device.

Individual Patient Isolation

Mass Isolation/ Surge Capacity

ECU2 Bundle

Mass Patient Isolation

ECU2 Corridor Flange

When planning for isolation/surge capacity emergencies, healthcare organizations need to consider how to isolate larger areas in addition to smaller, individual rooms. The ECU2 Corridor Flange Accessory can be used to create mass isolation by enabling any facility to use existing corridors, wings or floors allowing the area to expand as demand increases.
