

Risk Mitigation Management Joint Commission Required Results

National focus on Healthcare Associated Infection (HAI) has increased awareness of how environmental factors can impact secondary infection rates. A properly operating HVAC system must not only provide high IAQ for patient environments but also deliver the appropriate pressure relationships to prevent the spread of infection.

EC.02.05.01

- Hospital manages risks associated with utility system
- (D)(M)** - Written plan for and record of all component maintenance
- (A)** - In operation the HVAC system delivers the appropriate pressure relationships and IAQ

EC.02.05.05

- (D)(A)** - Hospital inspects, tests and maintains HVAC system (life support utility)

IC.01.05.01

- HVAC is integrated into infection prevention (IP) activities

HR.01.04.01

- (D)(M)** - Staff orientation on appropriate (IP) duties is documented

LD.01.02.01

- (M)** - Leadership ensures performance improvement programs address IP problems identified by infection preventionists
- * A second deficiency can be assigned if no action is taken

LD.04.04.01

- Leadership reprioritizes performance improvement activities in response to changes in environment

NPSG.07.03.01

- (A)** - Implement evidence practices to prevent HAI due to MRDO

NPSG.07.05.01

- (M)(A)** - Implement evidence practices to prevent HAI due to SSI

PI.03.01.01

- Hospital improves performance on an ongoing basis

- (A)** indicates direct impact requirements apply
- (M)** indicates Measure of Success if needed
- (D)** indicates that documentation is required

Family Operated 1940 - 2010
Trusted Quality & Experience

Risk Mitigation Management Benefits

- Reduces Risk of Outbreak
- Prevents Area Shutdown
- Avoids Crisis Management
- Prevents Loss of Life
- Supports Accreditation
- Avoids Reimbursement Loss
- Improves Reputation

Operating & Budget Benefits, Joint Commission Inspection Preparation

Mintie provides a higher level of service. From access to national facility and infection control leadership to 24 hour emergency response, Mintie is a comprehensive indoor air quality service provider with unsurpassed commitment to finding customers the solutions they need and working together to implement them.

Benefits of HVAC System Cleaning and Rehabilitation

- Protect Patient and Staff Health
- Better working environment
- Reduced HAI Liability
- Regulatory Compliance
- Reduced operating costs
- Maintained parts use up to 30% less power
- Increased system life, up to 20%
- Reduced burden of deferred maintenance on capital funding

Benefits of using Mintie Third Party Services

- Allows the use of non-operational monies as the criteria meets the definition of "capital expenditure"
- Allows staff to focus on other requirements
- Ensures high quality maintenance
- Introduces current best practices and equipment to facility and staff
- Allows restructuring of maintenance programs to reduce plant operating costs
- Third party photographic records and reports provide litigation protection and build confidence
- Ensures readiness for Joint Commission inspection/accreditation
